# ActionPlas

GROUP

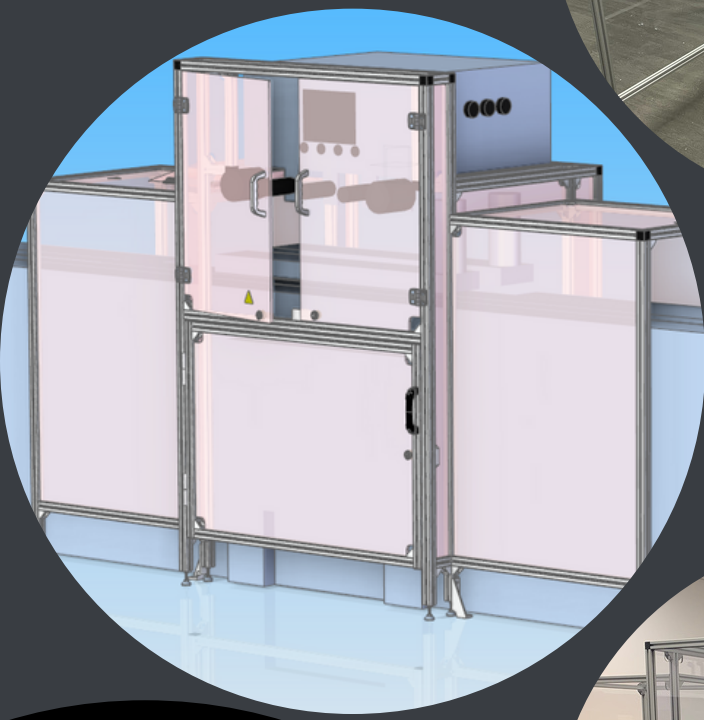

This is a case study showcasing work we have done for a Blue-chip client in the beverage industry. The client wanted to reduce the risk of staff injury and compromised product quality by guarding many of the open areas on their line. Our projects team designed, manufactured and installed a system to suit the clients requirements.

# ActionPlas

GROUP

This is a guarding system for a client we work with in the personal hygiene industry. Due to health and safety requirements and machine downtime this project was required on a quick turnaround basis
